

BIO-BALANCE HEALTH ASSOCIATION Inc.

NEWSLETTER TO MEMBERS

June 2005

Recent Developments:

In April 2004, Dr. Bill Walsh PhD from the Health Research Institute –Pfeiffer Treatment Center, came to Australia to work with Dr. Richard Stuckey of the Border Medical Clinic in Coolangatta.

Dr. Stuckey treated many patients with a range of mental illnesses at that time, and has since treated many more patients with very gratifying results. Dr. Stuckey informed members at our last Annual General Meeting in August last year.

The Bio-Balance Health Association was responsible for having a range of essential tests established in Australia and bringing Dr. Bill Walsh to Australia to allow this treatment approach to be established. Our aim has always been to build on this base and bring further knowledge to Australia so than an increasing number of patients can benefit from this treatment.

The Pfeiffer Treatment Center in Warrenville, Illinois, USA treats patients for very wide range of disorders including ADD, ADHD, Child Behavioural disorders, Bi-polar, Schizophrenia, Depression, Autism and Alzheimers.

Marion Redstone in Sydney, has in recent years interested a large group of families with children suffering from Autism, in going to the Pfeiffer Treatment Center in USA for treatment. Because of the success of the visit by Dr. Walsh to Australian I April last year the Pfeiffer Treatment Center

decided to conduct an “Outreach Clinic” in Sydney in “April this year to save patients the difficulty and cost of travel to USA.

This Outreach Clinic was organized by Marion Redstone in Sydney and brought together doctors form NSW, Victoria, South Australia and Queensland for training as well as treating more than 100 patients for a large range of disorders.

In order to conduct the Clinic, three of the Pfeiffer Treatment Center’s top staff came to Australia –

- Suzanne Speckman, Chief Executive Officer
- Dr. Allen Lewis, Chief Medical Officer
- And Bill Walsh PhD, Research Director.

The Outreach Clinic was an outstanding success, and a public meeting was also held with presentations by Suzanne Speckman, Dr. Allen Lewis and Bill Walsh PhD.

Exciting News:

The Pfeiffer Treatment Center will be conducting a further Outreach Clinic in February in Sydney next year (2006) and will be bringing an even larger team this time. This will mean that additional patients will be able to be consulted and more doctors trained bringing an even larger development and expansion of this work in Australia. We are very excited about this development and Bio Balance will keep members informed on progress in this area.

International Visitors:

Patrick Holford who runs the Brain Bio Centre in Putney, London UK and also the Institute for Optimum Nutrition visited Australia again in March this year and presented to a number of practitioners on the Gold Coast. Patrick is the author of “*Optimum Nutrition for the Mind*” and “*The Optimum Nutrition Bible*” and a number of other important books.
